DETAILED ACTION

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 8/28/02 has been considered by the examiner.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification recites "the cooling apparatus 100 serves to electrically connect the anode of one repeatable fuel cell unit to the cathode of an adjacent unit" [0013]. If the cooling apparatus has a cavity allowing the fluid from the upper section to enter the lower section, then the same fluid (oxidant or gaseous fuel) would contact both anode and cathode surfaces. Figure 1 shows the fluid 190 contacts the cathode surface 200. As disclosed by the specification, another fuel cell is located adjacent the lower section 130. Hence, the fluid 190, via cavity 180, contacts both the cathode 200 of a first fuel cell and the anode of a second fuel cell. In order for a fuel cell to operate, an oxidizing fluid contacts the cathode and a fuel fluid (i.e., hydrogen) contacts the anode. It is unclear how the fuel cell generates power since the same fluid (i.e., oxidant or gaseous fluid) contacts both the anode and the cathode electrodes. See Figure 3 of the specification.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 6 and 14 contain trademarks, which are not permitted in claim language because they render the claim indefinite.

Conclusion

If Applicant believes a telephone interview would clarify the invention and expedite prosecution of the application, Applicant is invited to telephone the Examiner to discuss the 35 U.S.C. 112, 1st, rejection above.
